Exercise Day 5

<u>Exercise Stadt Land Fluss v.2)</u>

Expand Stadt Land Fluss with the following points:

- Safe the results in a dict with the question as key and the answer(input) as value
- Every time the program is used, a new file with the results should be saved as Name_Letter_Time(HH_MM at begin)
- For advanced, if-statements have to be used:
    - o Remove all values, that do not start with the chosen letter.
    - o All values that have to be removed should have a warning.
    - o Add information to the output how many questions where wrong.

If you finish earlier, you can continue working in the book, help other participants, or start working on application documents.
